

Access controls worksheet

	Note(s)	Issue(s)	Recommendation(s)
Authorization /authentication	Objective: Make 1-2 notes of information that can help identify the threat: ● Who caused this incident? ● When did it occur? ● What device was used? <i>The incident was caused by the head of legal. The event happened at 8:29:57 AM. The device used was a computer named 'Up2-NoGud'</i>	Objective: Based on your notes, list 1-2 authorization issues: ● What level of access did the user have? ● Should their account be active? <i>The user seems to have Admin Access. The head of legal does not need Admin access to the system/Network.</i>	Objective: Make at least 1 recommendation that could prevent this kind of incident: ● Which technical, operational, or managerial controls could help? <i>The principle of least privilege should be applied here, The head of legal is not in charge of finances and is not shown to be apart of the finance team, so they have unnecessary permissions and should have them removed.</i>
